

FOR HANDSOME ENTRANCEWAYS: OVERHEAD CONCEALED OPERATORS WITH BUTT-HUNG DOORWAYS

Engineered drawing of Dor-O-Matic's overhead concealed butt hung doorway.

Dor-O-Matic Inc. turns architectural designs into functional reality, particularly with its sophisticated overhead concealed operators that are compatible with butt-hung or offset pivot door designs.

Dor-O-Matic operators provide smooth, quiet, trouble-free electromechanical operation with precise microprocessor control for ADA or higher traffic operations. Its overhead concealed operator design hides the arms and other operating mechanics to preserve the aesthetic integrity of any entranceway.

Cross section of the operator.

Dor-O-Matic Overhead Concealed Operators Designed for Beauty and Reliability:

- Fully compliant with ANSI A156.19.
- Factory assembled and programmed for fast, easy installation and precise operation.
- Internally tested to 10,000,000 cycles.
- Preserves architectural integrity – available in anodized, clad or painted finishes for interior or exterior applications.
- Power boost closing for secure latching.
