New 4030 Series Closers

Compact Control

“Everything you’ve come to expect in an LCN 4000 Series Closer, only smaller.”

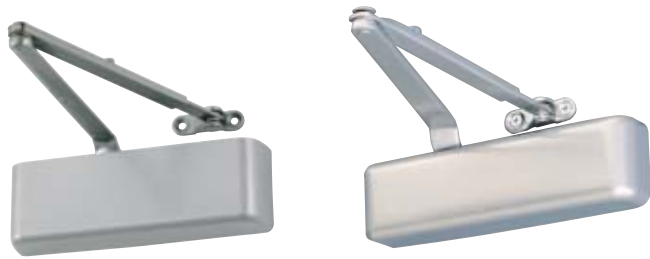

LCN’s new 4030 Series is now a universal closer available with heavy duty, forged steel arms, multiple arm options, standard metal cover and a peel and stick template for easy installation. The New 4030 even suites with the popular LCN 4040 Series Closer, giving you a good looking design for any application and budget.

The heart of the New 4030 Control Series begins with the durable cast iron cylinder body construction to handle tough traffic environments. The low profile metal cover is not only pleasing to the eye, but helps protect it against vandalism and theft. Best of all the New 4030 cylinder body is universal, so its easier to stock and easier to sell.

The closing power and control of the LCN 4030 Control Series is transferred from the body to the door through forged steel arms. Arms are the most vulnerable part of the closer, that’s why the heavy duty forged steel arms come standard on the New 4030 Series Closer. Heavy duty forged steel arms have greater strength, better appearance and less bulk. They also help resist bending and breaks from abuse and side loading.
